SAM4S

Exceptional POS Capability

Using robust integrated SAM4POS software, your authorized SAM4s dealer can customize the application to meet your specific needs by choosing from an array of features available for food and retail operators.

- Casual Dining • Family Style Restaurants • Bar/Restaurants
- Quick Service Restaurants • Sandwich • Bakery • Pizza
- Coffee • Taco • Hamburger • Ice Cream and Yogurt • Deli's
- Specialty Foods • Specialty Gourmet • Concessions
- Liquor Stores • Beer/Wine • Gift Shops • Thrift Stores
- Grocery • Pharmacy • Tobacco • Vape • Convenience Stores

On Screen Manager and Program Access

Access manager and programming functions intuitively through menus and on-screen options. Programming and editing can be accomplished without referring to manuals. Managers may easily view report data and quickly adjust to changing conditions.

Standard Network Support

SAP-630 series and SAP-6600 can be connected and combined in a fast and reliable Ethernet network. Networking supports report data consolidation, database programming, plus printer and video requisition routing.

Remote Printers

The BTP-L520 Label Printer is an essential inventory system accessory. For item or shelf, the BTP-L520 produces direct thermal labels in the format of your choice.

The SAM4s Elix 40 high speed thermal printer or SNBC BTP-M300 impact printer can print requisitions for your kitchen or preparation area.

Labels printed on the SNBC BTP-L520 thermal desktop label printer shown actual size.

Use an SD card or USB thumb drive for Program Save/Load, report or screen capture, firmware updates and graphics uploading. Connect a keyboard to make programming quick and easy.

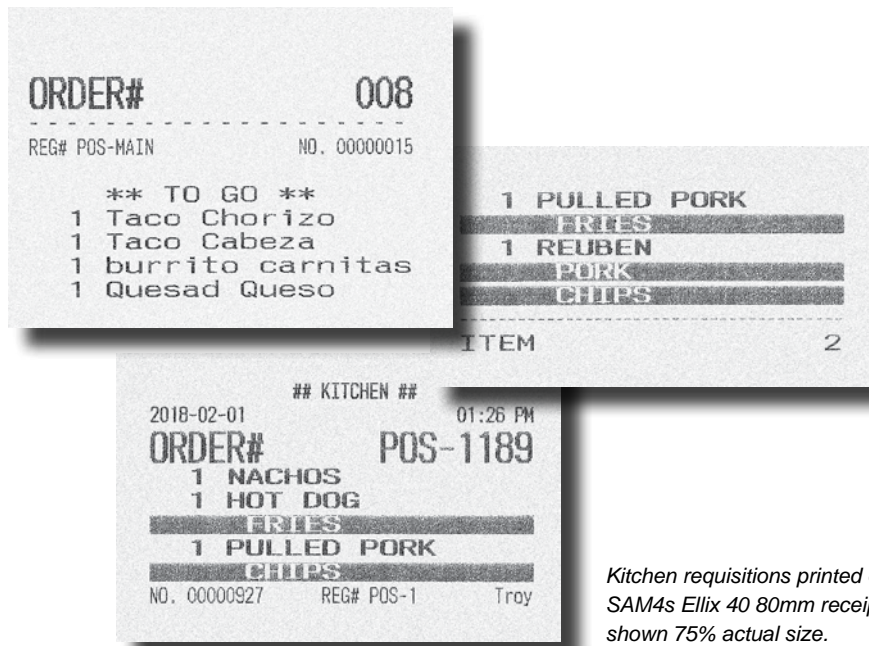

Easily move totals from the store to your PC using PC/Poll.

Print highly configurable customized labels using the SNBC BTP-L520 thermal desktop label printer – no PC required.

Highly Configurable Kitchen Printer Requisitions

Kitchen requisitions printed on the SAM4s Ellix 40 80mm receipt printer shown 75% actual size.

Ensure Speed, Security and Efficiency with Semi-Integrated Credit, Debit and Gift Card Payments

Out of scope electronic payment sales can be processed in a single step at the SAM4POS terminal by using an optional Datacap™ integrated payment appliance.

- SAM4POS is electronic payment and gift card processing ready.
- EMV Transactions can be processed quickly using the latest Datacap IPTran-LT™ or PDC/TranServer™ technology with select PIN Pads and a persistent internet connection.

Supports Popular POS Peripherals and System Options

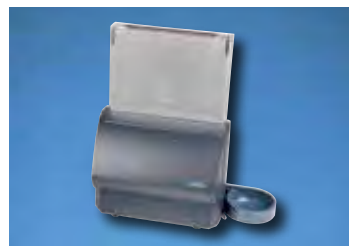

Each SAM4POS Terminal can support popular system devices including cash drawer, kitchen printer, coin dispenser, scale, pole display, kitchen video, video surveillance, UPC scanner, liquor dispenser and Datacap Tran™ semi-integrated credit.

Enjoy the advantages of scanning – price control, item movement reporting and labor savings.

Accurately send weights to SAM4POS for price calculation. SAM4POS can automatically subtract tares and report item sales by weight (Certificates Pending).

Improve productivity and reduce cash handling time. Increased accuracy and faster throughput will provide a prompt return on investment.

Visually promote products and specials with the SAM4s ML700 7" graphic remote customer display.

The SAM4s Ellix 40 high speed thermal printer can print requisitions for your kitchen or preparation area.

The E-PAD Video Controller provides a powerful way to speed service and increase employee productivity.

By controlling portion sizes and locking down inventory, Berg Liquor Control Systems have increased revenues, profits, simplified reporting and maximized cash accountability.

Video surveillance can be targeted and activated for selected workstation and POS terminal activity.
